- Continuous testing and quality assurance

1. Requirement Analysis
2. Solution Design
3. Development
4. Delivery & Support

OUR PROVEN PATH TO SUCCESS

By choosing Woodridge for your project, you get a dedicated and skilled team of designers, developers and project managers focused on making your software a success. Our process is user-focused and designed to launch your project quickly and effectively, while constantly receiving feedback and improving. We start a project with deep user analysis and take you all the way through post-launch support and maintenance.

IDEATE

Understand the business goals and help refine and develop a digital strategy

USERS

Pair User Strategy with Business Strategy. Know the users, their needs and their goals

UX

Design the User Experiences through user flows, wireframes and prototypes

UI

Bring the experience to life through User Interface and Visual Design

DEVELOP

Secure Front and Back-end, Full-stack development. Working software delivered every 2 weeks

QA

Quality Assurance Testing of our work and iterations with the team to ensure expected results

QA

When all sprints are complete and User Acceptance Testing (UAT) passes: Go Liv

Why Us ?

Experienced & young team

Worked with startup to fortune 500 companies

Transparent Process

No hidden Cost

On-time Delivery

Friendly Support
